Introduction

The IPS215-4POE switch is a kind of unmanaged industrial PoE switch, it support 5 10/100Base-T(X) ports. The 4 Fast Ethernet port (1~4) support Power-over -Ethernet (PoE) function. The switches are classified as power source equipment (PSE), and when used in this way, the IPS215-4POE switches enable centralization of the power supply, providing up to 30 watts of power per port and reducing the effort needed for installing power. The switches can be used to power IEEE802.3af/at standard devices (PD), eliminating the need for additional wiring.

It support CE, FCC standard, IPS215-4POE adopt industry standard design, IP40 protection, rugged high-strength metal case, power supply input (48VDC). The switch support IEEE802.3/ IEEE802.3u/ IEEE802.3x with 10/100M, full/half-duplex, and MDI/MDI-X auto-sensing, providing reliable and economic solution for your industrial Ethernet network.
